

CONCEPTS

THE ZIPPER

to provide a visual connection between the park and the neighborhood.

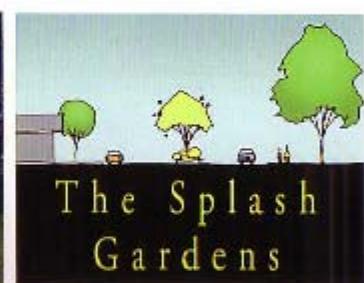

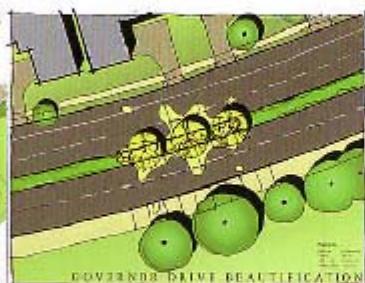

The Zipper

extend zipper "lines" across the roadway from the park to the median that would contain specific natural elements or images that relate specifically to the park,(and vice versa) paving at "tines" may be textured and colored as it transverses the roadway to the median.

THE SPLASH GARDENS

to fill the large void between the park and the neighborhood with color and energy.

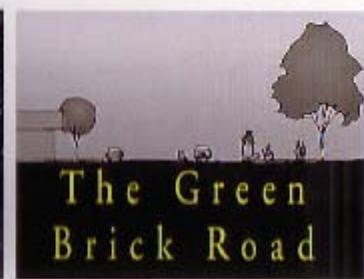

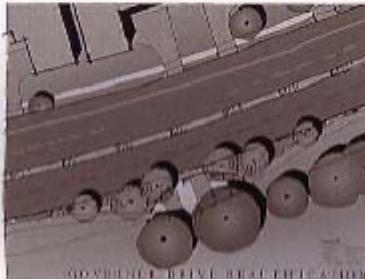

The Splash Gardens

create specifically themed splashes of color-gardens as specific events along the roadway planting may be of specific foliage or flowers to create a special color-theme

THE GREEN BRICK

ROAD to humanize the sidewalk, to give part of the sidewalk back to pedestrians.

The Green Brick Road

create a path by meandering the sidewalk,green colored concrete/pavers,create places to gather, whimsical follies in the median opposite the gathering spaces create a sense of enclosure.
